

Hat Creek Rim Site Improvement Proposal

In 1996, the Hat Creek Rim flying site began operating under a recreational (non-commercial) United States Department of Agriculture Forest Service (USDAFS) Special Use Permit. This Use Permit has very specific and binding terms that govern this recreational flying site. This Use Permit is issued to the Shasta Sky Sailors; they are liaison between the flying community and the Forest Service. All proposed changes or improvements to the Hat Creek Rim flying site will be evaluated by the Shasta Sky Sailors Hat Creek Committee to ensure that they fall within the Use Permit's guidelines. Upon review by the Shasta Sky Sailors Hat Creek Committee, the proposal will be forwarded to the Forest Service for their review and final decision. You will be notified as soon as the Forest Service has made its final decision – please be patient.

In order to fully understand the scope of your proposal, it is necessary for you to attach as much detailed information as possible, including plans, drawings, pictures, etc.

Name and/or organization: _____ Phone # _____

Mailing address: _____ Email: _____

Proposed changes/improvements: _____

This proposal will benefit: Paragliding Hang Gliding Both The Public Other _____

Explain the purpose of the proposed project: _____

Who will be doing the work: _____
